SPOTLIGHTS 2008

Combining the best of contemporary living and Hawaii's ancient traditions, Hillhouse Architects, Inc. designed West Maui Breakers, a 90-unit condominium community, to nestle in with the island's natural elements. With white sandy beaches yards away, residents can enjoy turquoise waters, emerald-green golf courses, lush forests and fields of golden pineapples, all within a few miles of Lahaina.

West Maui Breakers is a family-friendly community, ideal for young professionals and retirees looking for privacy and a relaxing place to call home. Soothing island breezes compliment the property's common amenities, including a 26-yard pool, spa, exercise room and barbeque area.

Residents can choose between 14 floor plans, which make up West Maui Breakers' five buildings. Each of the approximately 450 to 1,400-square-foot units come with luxurious custom finishes, granite, porcelain tile, maple cabinetry and stainless-steel appliances. And in traditional Hawaiian style, each condo has a private lanai with breathtaking ocean or mountain views.

When West Maui Breakers wanted to offer residents of this upcoming beach community affordable luxury housing, they went to Hawaii Escrow and Title, Inc.
